Art Unit: 1791

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13-17, 20-22, 27 and 29-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Richard in view of Soane –514 and Nagata et al for reasons of record as set forth in paragraph 1 of the last office action.

2. Claims 18 and 23-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Richard in view of Soane –514 and Nagata et al and further in view of Shen et al for reasons of record as set forth in paragraph 2 of the last office action.

3. Claims 19, 24 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Richard in view of Soane –514 and Nagata et al and further in view of Orlosky for reasons of record as set forth in paragraph 3 of the last office action.

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422

Art Unit: 1791

F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 13-32 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-17 of U.S. Patent No. 6,391,231 in view of Soane –514 and Nagata et al for reasons of record as set forth in paragraph 4 of the last office action. It is noted that applicant filed a terminal disclaimer in response to the double patenting rejection. However, the terminal disclaimer has not been approved at this point. Upon approval of the disclaimer, this rejection will be dropped.

5. Applicant's arguments filed September 25, 2007 have been fully considered but they are not persuasive. Applicant submits that since the instant application claims priority from an earlier filed application that predates Richard, and that Richard is only being relied upon to teach aspects that were disclosed in the earlier application, that it does not constitute prior art unto the instant application. However, the instant claims recite subject matter that was not disclosed in the earlier application, and hence none of the claims are in fact entitled to the earlier filing date. Applicant can only receive an effective filing date of March 13, 2001, which is the earliest filing date for the polyurethane-based polymeric material that sets in 30 seconds. The double patenting rejection has been maintained since the terminal disclaimer has not been approved. Upon its approval, the rejection will be dropped.

**6.THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

7.Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mathieu D. Vargot whose telephone number is 571 272-1211. The examiner can normally be reached on Mon-Fri from 9 to 6.
